NS1 DDI Starter Package

Overview

The NS1 Starter Package is designed to get you up and running on NS1 Enterprise DDI. This package has been designed as a 4-day engagement through which you will gain access to dedicated Professional Services resources who will:

- ▶ Develop a project plan covering the deployment and migration phases of the project
- ▶ Provide assistance with initial deployment of services
- ▶ Provision access to tooling and procedures used to validate the migration
- ▶ Train your team on how to operate the product
- ▶ Develop a handover plan

The project plan will be designed based on your requirements and goals to ensure that deliverables are achieved in the desired timeline. During the initial deployment phase, NS1 will ensure that all services are fully functional and properly configured for your environment. The tools, procedures and trainings will enable your team to successfully execute on the migration plan and continue to operate the platform efficiently.

Milestones	Features
At completion of the sessions included in the Starter Package you will have:
